### Lab7 Prompt Eng. (Stable Diffusion)

These images are created through the Stable Diffusion technique to help create a hamburger related image, adding layers of culinary elements and details to enhance realism, appeal, and placing the scene in a cozy diner setting.

#### Step 1: Basic Image

Generate an image of a clean kitchen counter.

#### Step 2: Add Environment

Include kitchen utensils and a stovetop, setting a cooking ambiance.

#### Step 3: Specify Time and Lighting

Adjust the lighting to simulate natural daylight, illuminating the kitchen.

#### Step 4: Add Burger Ingredients

Display a fresh bun, lettuce, tomato, onion, cheese, and a cooked patty on the counter.

#### **Step 5: Assemble the Burger**

Show the process of stacking the ingredients to form a mouth-watering burger.

#### **Step 6: Enhance Presentation**

Place the finished burger on a plate with a side of golden, crispy fries.

#### **Step 7: Add Condiments and Sauces**

Include containers of ketchup, mustard, and mayonnaise on the counter for customization.

#### **Step 8: Introduce Beverage**

Display a cold beverage, like a soda or milkshake, beside the plate.

#### **Step 9: Incorporate a Diner Setting**

Show a cozy diner booth in the background, creating an authentic burger joint vibe.

#### **Step 10: Enhance Realism and Detail**

Fine-tune the details, emphasizing the textures of the burger, condiments, and the atmosphere of the diner setting.
